2025 – key highlights

2025 was a year of strong performance and significant strategic progress. We achieved record realisations, delivering very attractive returns which supports our confidence in future fundraising. We continued to scale our Credit, Secondaries and Infrastructure platforms, which now comprise over half our Fee-Paying AUM, and we are seeing very encouraging momentum in Private Wealth and Insurance. Pre-marketing of our Private Equity Europe/Americas Fund X is progressing well, ahead of expected launch in early 2027. There is an exciting market opportunity ahead of us and we are very well placed to capitalise on it.”

Strong performance in 2025

Financial highlights

In addition to the statutory financial results, the Group also presents adjusted measures that help to illustrate the underlying operating performance of the Group. The Company believes that these Alternative Performance Measures (APMs), in addition to IFRS measures, help to provide a fuller understanding of the Group's results. Comparative figures for the year ended 31 December 2025 include pro forma adjustments to reflect the results of the Group as if the Pre-IPO Reorganisation and acquisition of CVC DIF occurred at the start of the comparative period. This is primarily because 2024 statutory results do not reflect the 2024 Pre-IPO reorganisation for the full period and as such only include eight months of CVC Credit and six months of CVC DIF. For discussion on statutory performance and adjusted measures performance, refer to page 259.
